Fincross DIGITAL Co. Ltd.

## About joining the Specified Non-Profit Corporation Financial IT Association

Fincross DIGITAL

**Fincross DIGITAL Co. Ltd. (Headquarters: 6-5 Nihonbashi Kabutocho, Chuo-ku, Chief Executive Officer: Shuhei Namekawa) is pleased to announce that it has joined the Specified Non-Profit Corporation Financial IT Association (FITA) as a Financial Institution Member.**

The Financial IT Association was established with a new mission of cross-industry digital human resource development and IT democratization. To achieve this goal, the association will work to support the development of all financial-related talent and the transfer of skills to financial institutions, partner companies, and related organizations.

Fincross DIGITAL is a joint venture established for collaborative research and development, based on a partnership of seven regional banks that have agreed to work together in promoting the digitization of finance. Since then, one more bank has joined the partnership, bringing the total number of partnership banks to eight. The partnership is promoting initiatives to reduce the burdens of each bank, develop innovative services and technologies, and utilize big data, all of which will benefit the partnership banks by working together. In line with these efforts, we have also joined the FITA, agreeing with its mission of promoting the “IT democratization” as we pursue our business initiatives.
